

# Pulse registrators «Pulsar»

Designed to account for the consumption of water, gas, electricity or heat in conjunction with meters with a pulse output. Allows remote monitoring of energy resources.

## Technical data

Inputs possible	2, 3, 4, 6, 10, 16
Type of sense	Type of sense reed, transistor, active (potential)
Minimum pulse duration, ms	1
Pulse frequency, Hz,	Less than 100
Ambient temperature, °C	-10...+50
Internal clock accuracy, seconds/day	5
Battery life Up to, years	6
External supply voltage, V	7-25
Data history memory: hours/days/months	1080/180/24
Dimensions, mm	70x56x88
